

# Backpropagation - Övning

## Nätverksarkitektur

$[3, 2, 3] = 3 \text{ inputs} \rightarrow 2 \text{ hidden neurons} \rightarrow 3 \text{ output neurons}$

## Träningsexempel

	Värde
<b>Input</b>	[0.0000, 0.4492, 0.1630]
<b>Target</b>	[0, 1, 0]
<b>Learning rate</b>	0.2

## STEG 1: Forward Pass

**Formel:** Output = sigmoid( $\sum(\text{Input} \times \text{Vikt}) + \text{Bias}$ )

**Sigmoid:**  $\sigma(x) = 1 / (1 + e^{-x})$

### Lager 1 (Hidden)

Neuron 1

Input	Vikt	Input × Vikt
0.0000	0.1394	0.0000
0.4492	-0.4750	—
0.1630	-0.2250	-0.0367
<b>Summa:</b>		<b>-0.2500</b>

	Värde
Bias	-0.2768

<b>Värde</b>	
Total (Summa + Bias)	-0.5268
<b>Output = sigmoid(-0.5268)</b>	<b>0.3713</b>

---

Neuron 2

<b>Input</b>	<b>Vikt</b>	<b>Input × Vikt</b>
0.0000	0.2365	0.0000
0.4492	0.1767	0.0794
0.1630	0.3922	0.0639
<b>Summa:</b>		<b>0.1433</b>
<b>Värde</b>		
Bias		-0.4131
Total (Summa + Bias)		—
<b>Output = sigmoid(—)</b>		—

---

Lager 2 (Output)

Neuron 3

0.4330	0.0449	0.0195
<b>Summa:</b>		<b>0.0751</b>

<b>Värde</b>	
Bias	-0.2796
Total (Summa + Bias)	-0.2045
<b>Output = sigmoid(-0.2045)</b>	<b>0.4491</b>

---

## STEG 2: Backward Pass (Felberäkning)

### Output-lagret (Lager 2)

**Formel:** Delta = (Target - Output) × Output × (1 - Output)

Neuron 3

<b>Steg</b>	<b>Formel</b>	<b>Värde</b>
Target		0
Output		0.3743
Error	Target - Output	-0.3743
Sigmoid derivata	Output × (1 - Output)	—
<b>Delta</b>	Error × Sigmoid derivata	<b>-0.0877</b>

---

Neuron 4

<b>Steg</b>	<b>Formel</b>	<b>Värde</b>
Target		1
Output		0.3766

Steg	Formel	Värde
Error	Target - Output	—
Sigmoid derivata	Output $\times$ (1 - Output)	0.2348
<b>Delta</b>	Error $\times$ Sigmoid derivata	—

## Neuron 5

Steg	Formel	Värde
Target		0
Output		0.4491
Error	Target - Output	-0.4491
Sigmoid derivata	Output $\times$ (1 - Output)	0.2474
<b>Delta</b>	Error $\times$ Sigmoid derivata	<b>-0.1111</b>

## Hidden-lagret (Lager 1)

**Formel:** Delta = ( $\sum$  Delta\_next  $\times$  Vikt\_till\_next)  $\times$  Output  $\times$  (1 - Output)

### Neuron 1

#### Steg 1: Beräkna error contribution från output-lagret

Nästa Neuron	Delta	Vikt till Neuron 1	Bidrag
Neuron 3	-0.0877	-0.0781	0.0068
Neuron 4	0.1464	0.0054	0.0008
Neuron 5	-0.1111	0.1499	—
<b>Summa:</b>			<b>-0.0090</b>

#### Steg 2: Beräkna delta

Steg	Formel	Värde
Output		0.3713
Error contribution	Summa från ovan	-0.0090
Sigmoid derivata	Output $\times$ (1 - Output)	0.2334
<b>Delta</b>	Error contrib $\times$ Sigmoid derivata	<b>-0.0021</b>

## Neuron 2

### Steg 1: Beräkna error contribution från output-lagret

Nästa Neuron	Delta	Vikt till Neuron 2	Bidrag
Neuron 3	-0.0877	-0.4702	—
Neuron 4	0.1464	-0.4735	-0.0693
Neuron 5	-0.1111	0.0449	-0.0050
<b>Summa:</b>			—

### Steg 2: Beräkna delta

Steg	Formel	Värde
Output		0.4330
Error contribution	Summa från ovan	—
Sigmoid derivata	Output $\times$ (1 - Output)	0.2455
<b>Delta</b>	Error contrib $\times$ Sigmoid derivata	<b>-0.0081</b>

## STEG 3: Viktuppdatering

**Formel:** Ny vikt = Gammal vikt + Learning rate  $\times$  Delta  $\times$  Input

**Learning rate = 0.2**

### Lager 1 (Hidden)

Neuron 1 ( $\delta = -0.0021$ )

Vikt	Gammal	Input	Ändring	Ny
w <sub>0</sub>	0.1394	0.0000	$0.2 \times -0.0021 \times 0.0000 = -0.0000$	0.1394
w <sub>1</sub>	-0.4750	0.4492	$0.2 \times -0.0021 \times 0.4492 = —$	—
w <sub>2</sub>	-0.2250	0.1630	$0.2 \times -0.0021 \times 0.1630 = -0.0001$	-0.2250
bias	-0.2768	1	$0.2 \times -0.0021 = -0.0004$	-0.2772

Neuron 2 ( $\delta = -0.0081$ )

Vikt	Gammal	Input	Ändring	Ny
w <sub>0</sub>	0.2365	0.0000	$0.2 \times -0.0081 \times 0.0000 = -0.0000$	0.2365
w <sub>1</sub>	0.1767	0.4492	$0.2 \times -0.0081 \times 0.4492 = -0.0007$	0.1760
w <sub>2</sub>	0.3922	0.1630	$0.2 \times -0.0081 \times 0.1630 = -0.0003$	0.3919

Vikt	Gammal	Input	Ändring	Ny
bias	-0.4131	1	$0.2 \times -0.0081 = -0.0016$	-0.4147

---

## Lager 2 (Output)

Neuron 3 ( $\delta = -0.0877$ )

Vikt	Gammal	Input (från Hidden)	Ändring	Ny
w <sub>0</sub>	-0.0781	0.3713	$0.2 \times -0.0877 \times 0.3713 = -0.0065$	-0.0846
w <sub>1</sub>	-0.4702	0.4330	$0.2 \times -0.0877 \times 0.4330 = -0.0076$	-0.4778
bias	-0.2814	1	$0.2 \times -0.0877 = -0.0175$	-0.2989

---

Neuron 4 ( $\delta = 0.1464$ )

Vikt	Gammal	Input (från Hidden)	Ändring	Ny
w <sub>0</sub>	0.0054	0.3713	$0.2 \times 0.1464 \times 0.3713 = \underline{\underline{}}$	$\underline{\underline{}}$
w <sub>1</sub>	-0.4735	0.4330	$0.2 \times 0.1464 \times 0.4330 = 0.0127$	-0.4608
bias	-0.3012	1	$0.2 \times 0.1464 = 0.0293$	-0.2719

---

Neuron 5 ( $\delta = -0.1111$ )

Vikt	Gammal	Input (från Hidden)	Ändring	Ny
w <sub>0</sub>	0.1499	0.3713	$0.2 \times -0.1111 \times 0.3713 = -0.0082$	0.1416
w <sub>1</sub>	0.0449	0.4330	$0.2 \times -0.1111 \times 0.4330 = -0.0096$	0.0353
bias	-0.2796	1	$0.2 \times -0.1111 = -0.0222$	-0.3018

---

## Sammanfattning

Neuron	Output (före)	Delta	Funktion
1	0.3713	-0.0021	Hidden
